-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. Claims 5 to 7 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 1 to 3, respectively. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 to 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over the English abstract of Japanese patent 411071658 or Japanese patent 358153752.

4. The English abstract of JP'658 or JP'752, each discloses a multi-component alloy with constituents whose atomic% ranges overlap those recited by the claims; such overlap establishes a prima facie case of obviousness, see MPEP 2144.05. To distinguish claims over prior art, applicant will need to demonstrate (e.g. by comparative test data), that the more narrowly claimed ranges are somehow critical and productive of new and unexpected results.

5. Claims 1 to 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over the English abstract of Japanese patent 358042750, or Ueta et al (US Patent 5,951,789) or Sundstrom et al (6,485,679)

6. The English abstract of JP'750, Ueta in claim 3 of column 22, or Sundstrom in claim 1 of columns 5 and 6, each discloses a mult-component alloy with wt% ranges that appear to have atomic% ranges base on their molecular weight that overlap or closely approximate those recited by the claims; such similarities establishes a prima facie case of obviousness, see MPEP 2144.05. To distinguish claims over prior art, applicant will need to demonstrate (e.g. by comparative test data) that the more narrowly claimed ranges are somehow critical and productive of new and unexpected results.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah Yee whose telephone number is 571-272-1253. The examiner can normally be reached on Monday-Friday from 6:00 to 2:30.
